▲ *Falcon 8X is on display at Aero India 2017. Due to its long range, Falcon 8X is turning out to be one of the most preferred business jets in India. It has a range of 6450 nautical miles and claims to be the most comfortable, versatile and economic business jet in its class. The aircraft which entered the market in October last year has already been delivered to an Indian customer in January 2017.*
