Special

18th February 2015 (Day – 1)

Falcon Business Jets at Aero India 2015

Falcon Business Jets will be present at Aero India. Dassault Falcon is investing heavily in India to better serve its expanding customer base in the Indian subcontinent and prepare for future growth. The company is the Indian market leader for large cabin business jets, with approximately 20 aircraft currently in operation in the country, and delivery of several more expected over the next two years.

The performance of the Falcon fleet is well-suited to Indian operating conditions, where short airfields, elevated runways and high temperatures are common. The Falcon 2000 series has been in particularly strong demand because of its large cabin, exceptional flexibility, low operating costs and range, which allows passengers to fly from the southern tip of India to the north in a single hop.

The family of Falcon jets currently in production includes the tri-jets — the Falcon 900LX, and the 7X—as well as the twin-engine 2000LX, 2000LXS and Falcon 2000S. ||
