

LOCKHEED MARTIN

ENGINEERING A BETTER TOMORROW

Lockheed Martin is the leading global security and aerospace company, solving some of the world's most difficult problems through game-changing innovation and unmatched performance. From interplanetary space travel – to fighting cyber criminals – to building the only multi-mission 5th generation fighter in the world, Lockheed Martin has a strong and diverse portfolio of global security, citizen services, and scientific discovery defense

continues to build on its existing industrial partnerships with Indian companies.

Lockheed Martin supports corporate social responsibility activities such as the DST-Lockheed Martin India Innovation and Growth Programme (IIGP), which is designed to accelerate the launch of early-stage Indian technologies into the global marketplace. The only programme in India focused on using world-class commercialization strategies, IIGP has

has resulted in positive economic impact. The programme has helped participants and their companies generate revenues exceeding INR 1,500 crore (US\$275 million) during 2010–2012, thereby contributing significantly to the country's economic growth.

The company also participates in science, technology, engineering and math (STEM) educational initiatives including a partnership with Delhi Technological University's award

C-130J landing at DBO, Ladakh

and civil services capabilities.

In India, Lockheed Martin has had a presence in New Delhi for more than 20 years. In 2008, the Corporation expanded its footprint by establishing Lockheed Martin India Pvt. Ltd. as it looked to enhance its long-term commitment to the Indian market and industry. Lockheed Martin nurtures a strong and valuable partnership with India and has increased its presence in India as the country's economy has grown and relations with the US have strengthened. In addition to supporting India's global security needs and its civilian projects, Lockheed Martin

received an overwhelming response from innovators, inventors, scientists and researchers working across diverse sectors of the economy. The DST-Lockheed Martin India Innovation Growth Programme entered its eighth year on a new high with a record 1300 applications being received from diverse sectors. IIGP has helped several participants in their quest to find suitable business partners in India. This resulted in more than 300 agreements being signed between 2007–2013. winning UAV design team: and sponsorship of Science and Inventor's Fairs at local elementary schools.

Currently, Lockheed Martin's largest programme in India is the C-130J Super Hercules, the first major military contract between the U.S. and India in more than 40 years. From 2010 through 2011, Lockheed Martin delivered all six aircraft to the Indian Air Force on time and on budget.

In addition to delivering world class programs and capabilities, Lockheed Martin is also invested in local industry and the community.
