

Press Release:

Javelin Missile Demonstrates Extended Range and Versatility During Tests

ORLANDO, Fla., June 16, 2015 – The U.S. Army and the [Javelin](#) Joint Venture, comprising Raytheon Company (NYSE: RTN) and Lockheed Martin (NYSE: LMT), recently conducted successful live-fire Javelin missile engagements against tank targets from different launcher and platform configurations as part of a demonstration to current foreign military sales users.

Each of the three Javelin missiles used during the tests at Redstone Arsenal in Huntsville, Alabama, was fired from a different launcher or platform – from a Command Launch Unit (CLU); from a vehicle using a Remote Weapon Station (RWS); and from the U.S. Army’s recently deployed Containerized Weapon System (CWS), also using a RWS. The CLU-launched missile hit a target at 4,000 meters, while the vehicle-launched and CWS-launched missiles hit targets positioned at 1,100 meters and 700 meters, respectively.

“The Javelin Joint Venture is committed to expanding Javelin applications beyond the current man-portable role,” said John Halvey, Javelin Joint Venture president and Javelin program director at Raytheon Missile Systems. “We will continue to work with our customers to provide an effective system that improves platform lethality and enhances survivability.”

“Javelin is the world’s most versatile and lethal anti-tank weapon system,” said Richard Benton, Javelin Joint Venture vice president and Javelin program director at Lockheed Martin Missiles and Fire Control. “Its capability to engage targets at ranges beyond the current specification is validated, as is the ability to use one weapon from various platforms to address multiple missions.”

About Javelin

Javelin is a compact, lightweight missile designed for one-soldier operations in all environments. It is made by the Javelin Joint Venture, a partnership between Raytheon Company and Lockheed Martin. Javelin has been adopted by international armed forces around the world. It is currently fielded with the U.S. Army and U.S. Marine Corps, and has also been approved for 15 FMS customers.

About Lockheed Martin Corporation

Headquartered in Bethesda, Maryland, Lockheed Martin is a global security and aerospace company that employs approximately 112,000 people worldwide and is principally engaged in the research, design, development, manufacture, integration and sustainment of advanced technology systems, products and services. The Corporation's net sales for 2014 were \$45.6 billion. For additional information, visit our website: www.lockheedmartin.com.

About Raytheon

Raytheon Company, with 2014 sales of \$23 billion and 61,000 employees worldwide, is a technology and innovation leader specializing in defense, security and civil markets throughout the world. With a history of innovation spanning 93 years, Raytheon provides state-of-the-art electronics, mission systems integration and other capabilities in the areas of sensing; effects; and command, control, communications and intelligence systems, as well as cyber security and a broad range of mission support services.
