

MKU

**Hall C,
Booth No. 2.14**

mku®
gain the edge...

MKU Pvt. Ltd., is a leading manufacturer of ballistic protection solutions for personnel and land-air-sea platforms.

MKU will be showcasing 'Modulare Schutz Technik' at Aero India. The German Engineered, revolutionary attachment systems, enable the armour kits to be easily deployed on the aircraft, without necessitating any modification in the structure of the platform. This unique process and technology keeps the air worthiness intact. The Patented and battle proven attachment systems allow the armour kits to be easily removed for alternate missions like rescue/transport etc. requiring full payload capacity.

Complementing the 'ModulareSchutzTechnik', is the 6th Generation armour protection technology developed by MKU. It uses advanced materials, and specialised manufacturing processes, to reduce the weight and thickness of armour solutions by almost 40 per cent, resulting in operational benefits like increased useful payload and endurance. Also on display at the exhibition would a range of body armour and night vision devices for aircraft pilots.
