## TeleDNA Communications Private Limited

TeleDNA is a VAS infrastructure product company and its product portfolio can be deployed in tier-I, tier-II, or tier-III mobile operator networks. The company gained about 50 percent market share in providing robust platforms to mobile operators in India. The client base of the company includes Idea, Airtel, Bharat Sanchar Nigam Limited, Uninor, Tata Docomo, and Reliance Communications Limited. The company has been awarded as an emerging Indian VAS infrastructure provider by INFOCOM-CMAI National Telecom Awards.
